Technical Skills

- **Languages:** Java, Python, SQL, JavaScript, C/C++
- **Frameworks:** FastAPI, Spring Boot, React, Flutter, Firebase
- **Databases:** PostgreSQL, MongoDB, Elastic Search
- **Cloud & DevOps:** Azure Blob Storage, Azure AI Search, App containers, Key Vault, App services, Docker, AWS S3, AWS EC2, CloudFront
- **Tools:** Git, GitHub, Maven, Gradle, Confluence
- **Core Skills:** System Architecture Design, Software Architecture, Data Engineering, Machine Learning, Agile Development
- **Relevant Coursework:** Data Structures & Algorithms, DBMS & SQL, Operating Systems, Software Engineering, Data Science & AI in Healthcare

Education

International Institute of Information Technology, Bhubaneswar — Bachelor of Technology in IT	(Aug 2022 – Jun 2026)
St. Fateh Singh Convent School, Bathinda — Senior Secondary School	(Apr 2020 – Mar 2022)
St. Xavier High School, Rampura Phul — High School	(Apr 2008 – Mar 2020)

Experience

Backend & AI Engineer (Intern: Dec 2025 – Jun 2026; Full-Time: Jun 2026 – Present)	AI Ordinate
---	-------------

ADLS • Elastic Search • Python • Docker • React • FastAPI • ElevenLabs

- Led development of a production-ready **full-stack application** for a **Tier-1 pharmaceutical** client, integrating LLMs, image generation, and text-to-speech capabilities while adapting the platform to evolving product requirements
- Worked across **Azure** and **AWS** environments, to maintain and deploy traditional SaaS applications
- Served as the **primary engineer** for production deployment of a **regression-based machine learning model** for a fast-growing maritime startup, focusing on model reliability, evaluation metrics, and deployment readiness
- Built **fault-tolerant, resumable** document-processing pipelines that transformed over **14 Million unstructured documents** into searchable digital assets using **self-hosted Elastic Search** while maintaining data integrity at scale.

Projects

Maala	Flutter, Dart, Android Native
--------------	-------------------------------

- Built and deployed a Flutter-based mobile application with **responsive UI architecture** and native Android integrations using **Method Channels**
- Implemented scalable state management for real-time UI updates and **modular UI components** for smooth user experience
- Achieved **100+ installs** and consistent daily active users in production

Intelli-Relief	React, FastAPI, Docker, Nginx
-----------------------	-------------------------------

- Designed and built an end-to-end **full stack application** for disaster monitoring and response
- Integrated external APIs (OpenWeather, seismic data) to track real-time disaster signals and enable faster response workflows
- Structured the system using an **event-driven architecture** with modular services for scalability and maintainability
- Containerized services using **Docker** and configured **Nginx** for routing and deployment
- Integrated **Sentence Transformers** to generate semantic representations for audit trails and post-disaster analysis.

Snow Runtime	Python, Snowflake, CLI
---------------------	------------------------

- Constructing a **developer platform** that integrates **VS Code with Snowflake** to execute queries, browse database objects, and streamline data engineering workflows
- Defined **secure connection management** and command execution through a Python runtime powering both CLI and editor integrations
- Following **Clean Architecture** and **SOLID principles** to create an extensible platform capable of supporting authentication, history, and future developer tooling features

Certifications

- **Java Certification by GeeksforGeeks** – Java, OOP, Collections, Exception Handling, DSA
- **Software Architecture by CodeSignal** – SOLID, Clean Architecture, System Design, Cloud Fundamentals

Leadership & Achievements

- **LeetCode:** Top 5% with **700+** problems solved, **1000+** submissions. Titled 'Knight' with a contest **rating of 1900+**
- **CodeChef:** Rated as a **4-star coder** with a **rating of 1800+** on CodeChef and ranked **3370 globally**
- **Leadership: PR & Marketing Lead**, TARS Society – led outreach campaigns and enhanced visibility of the organization within the tech community
- **Open Source Contributions:** Actively contribute to open source communities such as **checkstyle**
